Pi has its own significance because Pi occurs in various mathematical problems involving the lengths of arcs or other curves, the areas of ellipses, sectors, and other curved surfaces, and the volumes of many solids. It is also used in various formulas of physics and engineering to describe such periodic phenomena as the motion of pendulums, the vibration of strings, and alternating electric currents. Every year 14th March is celebrated as pi because it indicates 3.14. Keeping this in mind, Department of Mathematics celebrated pi day on 14th March in GDC, Chintalapudi. Principal Dr.P.Srinivasa Rao garu appreciated the both the departments for their initiation of celebrating the occasion. Dr.D.Devanandam, lecturer in Mathematics explained brief history of pi and the contributions of mathematicians of different eras. He told that this is the right occasion for memorizing and understanding the contributions of great mathematicians of different era. Vice principal Dr. NJK Narendra Kumar garu applauded the faculty of department for observing this day and for habituating the students to a good traditions. With a formal cake cutting, the programme was closed. Definitely this program inculcates a different style of thinking in the young minds.
